

# Walking trails at evening and night Caution -

Natural zones are known as **HOME** to these characters. You are likely to cross paths with its resident wildlife , especially in the night hours.

They may roam through Paradiso Villas looking for garage doors left open or trash recepticles left out. That's an invitation !

RATS seek out cluttered garages and relish those bags of cat and dog food or bird seed. Snakes follow rats--a favorite meal. Water Moccasin snakes will leave their ponds to find frogs bedding down inside our water meters, so be cautious opening them !

These creatures will avoid a chance meeting and will be the first to flee.

Sidewalks here are well lighted at night. Yet, we urge you to be aware and exercise caution.
